Community Petition

We, the under-signed say NO to the cleanup plan that is being proposed for the old Velsicol Chemical Plant site; namely the proposal to cap the ground with 12 to 18 inches of soil and allowing the contaminated run-off to go into the sewer and eventually the Chattanooga Creek and Tennessee River. We want the Tennessee Department of Environment & Conservation to require a thorough and substantial cleanup by Velsicol that removes buried toxins, treats polluted water and does not put community health & safety at risk.
